Professional solutions to enhance office workflow

With a focus on flexibility, security, simplicity and reliability, the *Olympus DS-5000iD/DS-5000 Voice Recorders* offer numerous state-of-the-art features to boost the productivity of dictation users in all types and sizes of business.

Used in conjunction with the *Olympus AS-5000 Transcription Kit*, their possibilities are even greater – seamlessly integrating dictation and transcription into the daily office workflow.

These top-of-the-range devices are also complemented by the *Olympus DSS Player Pro R5 dictation management software* – a powerful new management tool that brings added versatility and efficiency to dictation workflows in a variety of IT environments, however small or large.

With multiple file-transfer options to suit individual needs, it makes managing dictation and documents easier than ever, and is simple to install, configure and maintain. The DSS Player Pro software even updates automatically, ensuring users have the most up-to-date solution, for optimum efficiency.

DS-5000iD DS-5000

The DS-5000iD and DS-5000 – tailored to meet all professional dictation needs – are part of the complete Olympus dictation solution comprising voice recorder, transcription kit and dictation management software.

Regardless of the dictation situation, these versatile voice recorders have all bases covered throughout the entire process.

So however diverse the tasks you need to perform, the DS-5000iD/DS-5000 can handle them. Organisation is effortless, with up to seven folders, holding up to 200 files each, and 32 index marks per recording. Plus, a number of other functions – such as the ability to add instruction comments and verbal annotations – ensure even greater control and efficiency.

Two different recording modes – including the new, extremely high-quality QP mode – ensures user control over quality and quantity, while the option to use both SD and microSD memory cards guarantees room to expand storage.

Housed in a luxurious matt-black metal body that exudes elegance, this voice recorder not only plays the part, it looks it too.

Combined with the Olympus AS-5000 Transcription Kit, plus corresponding DSS Player Pro R5 dictation management software, it's a complete digital dictation and transcription system for today's modern business professional on the move.

AS-5000

Businesses of all sizes can significantly enhance their efficiency by coupling the Olympus DS-5000iD/DS-5000 with the AS-5000 Transcription Kit – fully integrating dictation into the office workflow and, thanks to its recording clarity, making transcription from voice to text effortless.

The kit includes a footswitch and headset for ergonomic operation when transcribing, and new Olympus DSS Player Pro R5 software bundled with the kit optimises process efficiency.

Key Features

- High recording quality in DSSPro format
- Device lock function with biometric information (DS-5000iD only)
- Easy and comfortable operation on large slide switch which runs on rubber rollers
- File encryption and decryption

Designed for Hassle-free Operation

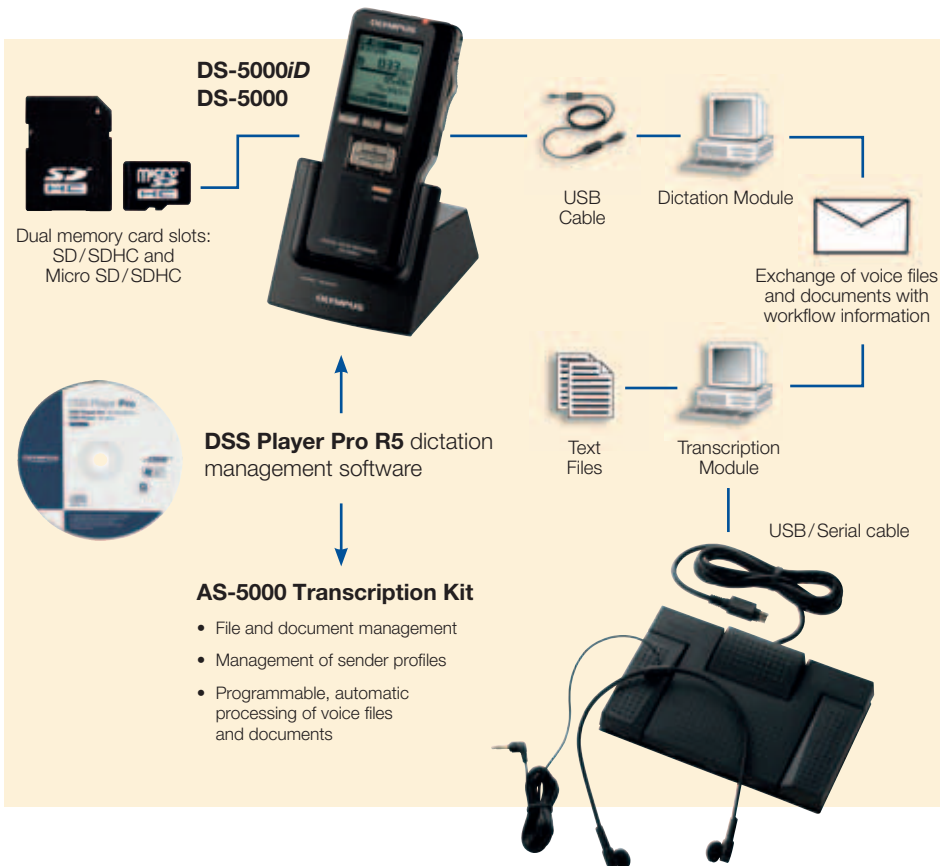

- Digital Voice Recorder in a luxurious matt-black metal body
- Large back-lit LCD, protected with a high-grade, coated screen
- Switchable slide switch guide
- 3 programmable smart buttons
- Centralised navigation buttons for easy data input and setting
- NEW-button
- Editing functions (overwrite/insert/delete/security lock)
- Smooth Cue/Review
- Index marks (up to 32 per file)
- File lock
- Hands-free dictation with optional footswitch
- Direct dictation into PC through USB cable

Enhanced Workflow and Efficiency

- Up to 7 folders for voice file management (200 messages per folder)
- Draft dictation function
- Voice comments: Instruction comments (1 per file) and verbal annotations (up to 32 per file)
- Priority setting
- Customise functions to user needs
- Author ID setting
- Worktype ID setting
- Option Item setting

High Performance

- Long battery life (up to 28 hours in SP mode with Olympus rechargeable battery pack)
- Microphone sensitivity level: CONF/DICT
- Dual memory card support
- Durable USB connector for one-hand dock and unlock at cradle
- Menu navigation with multiple language support (6 languages)
- USB 2.0 Hi-Speed, USB composite device (Storage/Audio/HID class)
- USB microphone/speaker full duplex
- Automatic software and firmware updates

Olympus DSS Player Pro R5 Software

The Olympus DSS Player Pro R5 dictation management software gives users the power and flexibility to enhance and manage their dictations and documents effortlessly in a host of IT environments and organisations, large or small, with support for multiple file-transfer options to suit specific needs. The software comes with DS-5000iD, DS-5000 and AS-5000 Transcription Kit.

Key features

- Security by DSSPro support and encryption/decryption
- SSL support for email/FTP
- Improved ergonomical designed Graphical User Interface, e.g.:
 - o Properties view for dictation properties and history
 - o Preview window for documents and email messages
 - o Top viewing for high priority dictation
 - o Filter function
- Comfortable individual device and system configuration (folder structure, workflow)
- Supports two types of voice comments: Instruction comments and verbal annotations
- New programming options for more flexible co-operation with Olympus DR-2000 and DR-1000
- Email support for POP3, SMTP, IMAP, Microsoft Outlook, Novell GroupWise, Lotus Notes and Extended MAPI
- Automatic email/FTP profile switching between local mode and network mode
- Full support for Citrix and Terminal Service
- MAC version included (reduced functionality)
