# Olympus WS-100

## Main features:

- ? USB mass storage device with integrated loudspeaker
- ? PC Link via "USB direct" for fast up- & downloads, just plug & play
- ? Acts as a drive on your PC without software installation
- ? Allows storage of any file type, not just voice files
- ? 3 Recording Modes: HQ mode for superior sound, SP and LP for extended recording
- ? Recording time 4hr 20min in High Quality (HQ)
- ? Up to 27hr 20min in LP mode
- ? 5 folders, 199 messages per folder for file management

Imagine the convenience of being able to transport an image-laden PowerPoint presentation for showing in a client's boardroom, record negotiations as they are discussed during the meeting and finally, when the deal is about to be clinched, upload the contract draft that was prepared in Word earlier. All this is now possible with just a single device that is both ultra-compact and stylish.

The slim-line Olympus WS-100 offers a high level of versatility and user friendliness. Featuring 64MB of memory, there is plenty of room for audio recordings as well as any other digital file type. The innovative design incorporates a USB connector directly on the body so that they can be plugged into the USB jack of virtually any PC. **No extra software, cables or drivers are required**. The computer instantly recognises the units which then act as an external drive on the PC, allowing files to be effortlessly dragged and dropped, to and from the voice recorders.

Using the high-quality Windows Media Audio (WMA) format, audio files are assured complete compatibility. They can be played back via Windows Media Player – the standard media program found on almost every PC.

Various quality recording modes add to the recorders' flexibility. Up to 27 hours and 20 minutes using Long Play mode in the **Olympus WS-100**. The WS-100 features an earphone jack and built-in speaker so that files can be listened to either in private or played to a small group.

Long battery life allowing up to 10 hours of continuous use and hassle-free operation makes the WS-100 an ergonomic, dependable companion. Naturally, a wide range of file management functions are included to help streamline workflow too. Five folders are on hand, each capable of storing up to 199 files. Recordings may be played back in a choice of speeds to simplify searching for specific sections of dictation. Unwanted files can be erased with ease and a lock function gives added security to your data. With their LCD monitors, users are also provided with extensive file information.
