

DMseries DM-720

* 1. Requires optional AC adapter.

High quality features packed in to an efficient, smart body. Outstanding practicality and reliability to support your business.

Product features

TRESMIC 3 microphone system for superior sound

The DM-720 features a 3-microphone "TRESMIC" system, which includes two directional microphones positioned at a 90 degree layout for enhanced stereo sound, and an omni-directional microphone at the center to faithfully capture the depth and fullness of sound. When the omni-directional center microphone is on, frequencies from 20Hz to 20kHz are picked up (60Hz to 20kHz when off), compensating for low-range sounds.

Impressive array of playback functions

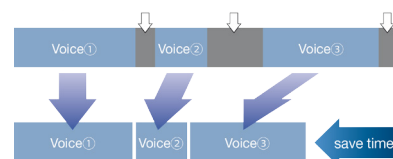

The Voice Playback feature lets you skip the non-voice portions of any recording and play back only the parts with voice. This allows for efficient transcribing of meetings and interviews. When recording meetings in large rooms, the recording levels of each sound tend to vary. Even in these cases, the Voice Balancer function adjusts the volume levels of all speakers to an even level so that it is easy to hear during play back.

High quality metal body with clip stand attachment

The attraction of the DM-720 is not simply in its recording and playback functionality, it also features high quality design and texture. An extensive range of advanced functions are packed into the compact body and enclosed in a high-class metal casing. The recorder also comes with a clip stand attachment which can be attached to your pocket or notebook as a clip, or it can be used as a stand to reduce noise when the recorder is placed directly on a table top.

Direct PC connection for convenient data storage and charging

The body of the DM-720 includes a built-in USB connector to let you connect directly to a computer merely by using the USB slide lever. Not only can you easily save and share your recordings via your computer without the need for cable or software, you can also recharge the unit from a PC without having to remove the batteries from the device. The recorder can also be used as a USB memory device.

Specifications

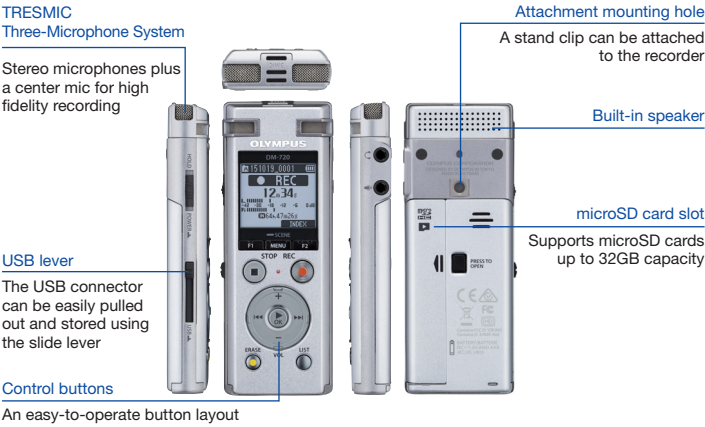

General		
Stereo / Mono (Built-in microphone)		Stereo/Tresmic
Recording Format		PCM/MP3
Internal Memory		4GB
External Memory		microSD (Max.32GB)
PC Connectivity		USB Direct
Plug-in Power		✓
Recording		
Microphone sensitivity		Hi/Mid/Low/Auto
Manual recording level setting		✓
Timer recording		✓
Zoom microphone		✓
Lowcut filter		✓
Internal microphone frequency range		20~20,000Hz (Center Mic ON)
Overall frequency response		
PCM	48kHz/16bit	20~23,000Hz
	44.1kHz/16bit	20~21,000Hz
MP3	44.1kHz/320kbps	20~21,000Hz
	44.1kHz/128kbps	20~17,000Hz
	44.1kHz/64kbps (mono)	20~13,000Hz
	11.025kHz/8kbps (mono)	20~3,500Hz
Recording time		
PCM	48kHz/16bit	5hr
	44.1kHz/16bit	5hr 30min
MP3	44.1kHz/320kbps	24hr 30min
	44.1kHz/128kbps	61hr
	44.1kHz/64kbps (mono)	123hr
	11.025kHz/8kbps (mono)	985hr
Playback		
Music player mode		✓
Noise cancel		✓
Voice playback		✓
Voice balancer		✓
Playback speed control		3.5X - 0.5X
A-B repeat		✓
Recording & playback scene select		✓
File divide		PCM/MP3
Index mark		✓
Calendar search		✓
Power requirements		AAA alkaline battery x1, or AAA Ni-MH rechargeable battery x1
External power supply		A514 AC Adaptor (Optional)
Battery life — Recording (LP mode)		52hr
Battery life — Playback (Earphone)		35hr
Internal battery charge		✓
Speaker / Maximum output		Built-in ø18mm round dynamic speaker/ 150mW
Dimensions (HxWxD)		105.9 x 39.6 x 14.4mm
Weight (including batteries)		72g
